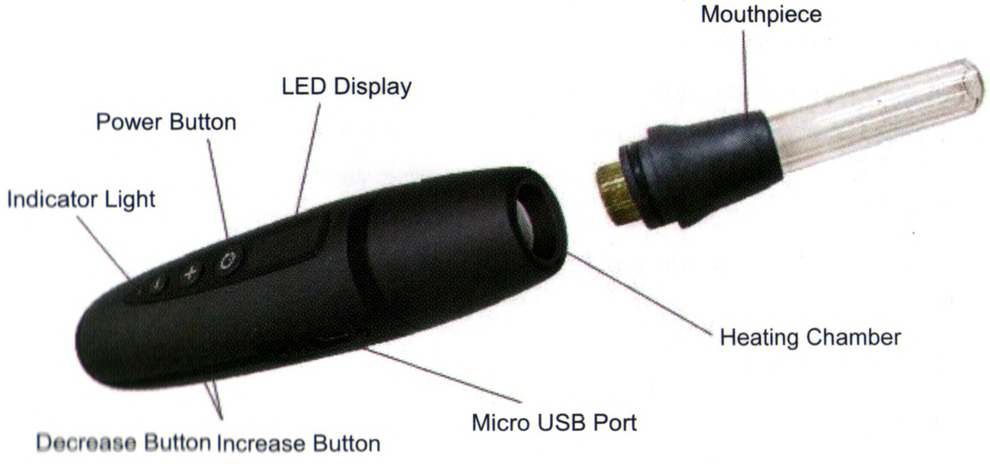
Introduction:

Thank you for purchasing BREIT®-HI super mini digital vaporizer that fits discreetly into the palm of your hand. It is a non-combustion vaporizer for dry herb, with advanced OLED display, ceramic heating chamber, isolated airflow tech and accurate temperature control from 300℉ to 435℉. BREIT® -HI is a qualify portable vaporizer with big vapor, full baked, pure taste and smooth airflow. Hope you will have a great vaping time with BREIT®-HI. To ensure a good performance and safety vaping, please read the entire guide carefully for instruction.

Structure



Packing Content:

1 x Breit-HI device
1 x glass drip tip
1 x USB charger
1 x cleaning brush
1 x dab tool
2 x silicone rings
2 x mouthpiece screens
1 x user manual

Specification:

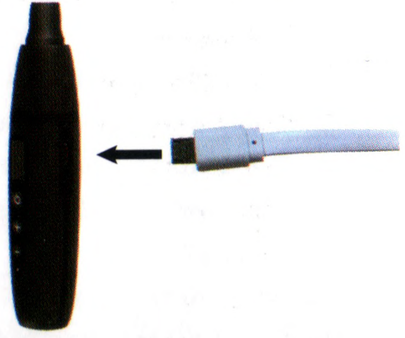
1. Battery can work about 40 minutes consecutively after full charge
2. Temperature Range: 300F-435℉/149-224℃.
3. Battery: 3.7V 16450 840mAh Li battery
4. Charger Standard: 5V/1.000mAh
5. Max. Work Current: 5A
6. Resistant and Max Output Watt: 0.7ohm, 23Watt
7. Material: Environment health PC, ABS, glass, ceramic
8. System protection: over charging protection, short circuit protection
9. Working Time: 5 minutes per work time

OLED Display:

1) OLED display will show when work normally: Battery Power, setting temperature or heating temperature.
2) Battery low: OLED shows “LOW voltage”.
The red light will blink 10 times and shows “LOW voltage” when device is nearly out of power in the working time, then turn off automatically to protect battery.
The red light will blink 5 times and shows “LOW voltage” when it is heating and then turn off automatically.
3) Temperature heat detector malfunction: OLED shows “CHEEK NTC” check?
4) Heating chamber checking malfunction: OLED shows “CHEEK FPC”.

Charging:

1) The charging current is 700mAh, please use 5V 1.000mAh charger to charge.
2) A full charge is recommended before first use.
3) The blue light will blink when it is charging; will light all the time when full charged, voltage is 4.15V to 4.2V.
4) It will take approximately 1 to 1.5 hour to charge full.
5) The Breit-HI will stop heating when charging in its working time and enter into charging situation to protect battery.



Preparing the Breit-HI:

1) Caution: While using the Breit-HI, portions of the device may reach high temperature. Wait until the device has completely cooled before handling.
2) When loading the Breit-HI, remove the mouthpiece from the heating chamber lightly.
3) Apply your dry herbs into the heating chamber. Be sure not to over-pack the chamber or too tight as this can reduce airflow, effect the bake effective.
4) Once your products as been applied, re-attach the mouthpiece.

Using the Breit-HI:

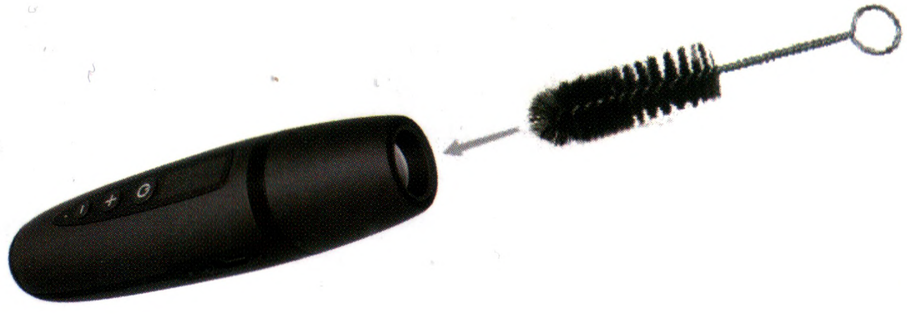
1) To turn on the Breit-HI by pressing the power button 5 times in rapidly succession.
2) When turned on, the Breit-HI will begin heating according to your last time use temperature.
3) You can control the temperature by press increase or decrease button and swift the temperature mode.
4) You can start to vape after reaching setting temperature (Blue light will be blinking when it is heating, will be lighting all the time when reach setting temperature).
6) After 5 minutes consecutively work, the Breit-HI will automatically shut down. This is the device's safety power duration. To start your next session, simply repeat the process outline on this page.
7) To turn off Breit-HI, press the power button 5 times in rapidly succession. The system will automatically shut down, too, when meet breakdown.

Temperature Settings:

1) The Breit-HI is capable of reaching any temperature within the ranged of 300-435℉/149-224℃..
2) By holding the power button for 3 seconds, you can switch between Celsius and Fahrenheit temperature.
3) The Breit-HI comes equipped with a built in memory function, and will automatically heat to your last temperature selected when turned on.
4) Use the "+ "or "-" button, you can increase or decrease the desired temperature when it is heating, 1℉ or 1℃ is a grade, the temperature adjust can be circulate (it will back to 300℉ when the temperature increased to 435℉and keep press "+" button; it will back to 435℉ when the temperature decreased to 300℉ and keep press "-" button).
5) Blue light will be blinking when it is heating, will be lighting all the time when reach setting temperature.

Cleaning and Maintenance:

1) Caution 1: While using the Breit-HI, portions of the device may reach high temperature. Don't clean or disassemble the device until all portions of the device have cooled completely.
2) Ensure that the BREIT-HI is locked before cleaning.
3) The brush tool included can be used to clean the ceramic heating chamber after use with dry herbs.
4) The mouthpiece can be cleaned using a 90% alcohol solution and a cotton swab.
5) Caution 2: Don't immerse the Breit-HI in liquid of any kind. This can damage the heating element and potentially harm the device.



Caution:

1) Please use the original BREIT®-HI chargers for this product. Or use high-quality compatible voltage chargers to charge this device.
2) To prevent over heating, BREIT®-HI products should be charged for maximum of 1.5 hours or until the appropriate indicator on the charger shows a fully charged battery, whichever occurs first. BREIT®-HI products should never be left unattended, overnight or on any flammable material, such as rugs, bed etc. while on a charge.

Warning:

- Don't charge the device over a fire source or extremely hot environment.
- Don't transport or sore the device with any metal items.
- Don't let the device come into contact with moisture.
- Don't pierce the housing with any sharp object.
- Don't hit or step on the device.
- Don't take the device apart or modify it in any way.
- Don't fill the heating chamber with any stem or seeds.
